In her latest book, *To the Moon and Back*, Mary Roach takes readers on a journey to the Moon with Apollo 11. The book is a moving and personal account of her experience, as well as a meditation on the nature of space exploration and the human condition.

Roach begins the book by describing her childhood fascination with space. She was always drawn to the stars, and she dreamed of one day becoming

an astronaut. When she was finally selected to join the Apollo 11 mission, she was both excited and terrified.

The journey to the Moon was long and arduous, but Roach and her fellow astronauts never gave up. They landed on the Moon on July 20, 1969, and they became the first humans to walk on another world. Roach describes the experience of walking on the Moon as "surreal." She says that it was like being in a dream, and that she felt a profound sense of awe and wonder.

After spending a few hours on the Moon, Roach and her fellow astronauts returned to Earth. They were greeted as heroes, and they were celebrated for their historic achievement. However, Roach says that the experience of going to the Moon changed her life forever. She says that she came back to Earth with a new perspective on the world, and that she is now more grateful for the beauty and fragility of our planet.

To the Moon and Back is a beautifully written and deeply moving book. It is a must-read for anyone who is interested in space exploration, or who is simply curious about the human condition.
