

Virtual Reality in Geography: Geographic Information Systems Workshop

This workshop will teach you the basics of virtual reality (VR) development, and how to use VR to visualize and analyze geographic data. You'll learn how to create immersive VR experiences that allow users to explore and interact with geographic data in a way that is not possible with traditional 2D maps.

Virtual Reality in Geography (Geographic Information Systems Workshop) by Andy Rathbone

What You'll Learn

- The basics of VR development
- How to use VR to visualize geographic data
- How to use VR to analyze geographic data
- How to create immersive VR experiences

Who Should Attend

This workshop is designed for geographers, GIS professionals, and anyone else who is interested in using VR to visualize and analyze geographic data. No prior experience with VR development is required.

Workshop Details

The workshop will be held on [date] from [time] to [time] at [location]. The cost of the workshop is [cost].
